- Worked on projects on CCNA and MCSA, collaborating closely with the course coordinator.
- Gained extensive experience in various aspects of web development, including designing different website layouts.

# PROJECTS

## UI/UX

### Xent

*Independent Project | May 2023 - Present*

- Prioritized performance and speed to deliver a smooth and responsive user experience.
- Included features such as maps, reviews, ratings, and additional information to help users make informed decisions.
- Employed a efficient and modern design aesthetic to enhance the overall user experience.
- Utilized Figma's design capabilities to create consistent and visually appealing layouts.
- Implemented a feature that provides users with detailed information about the most popular places in each city.
- Designed a mobile application called Xent using the Figma design tool

### GeoFynd

*GeoFynd | March 2023 - April 2023*

- Created a fully responsive website with a focus on efficient design and user-friendliness.
- Leveraged Bootstrap 5 framework to ensure a consistent and visually appealing design across different devices and screen sizes.
- Developed a clean and intuitive user interface that enhances user experience. Incorporated responsive design principles to ensure seamless usability on desktops, tablets, and mobile devices.
- Ensured cross-browser compatibility and adherence to web standards.
- Paid attention to details, such as color schemes, typography, and imagery, to create an appealing visual experience.
- Followed best practices for web design and usability to create an efficient and user-friendly website.

### JoJo Pets

*JoJo Pets | Feb. 2023 - May 2023*

- Designed the mobile application "JoJo Pets" with a focus on amazing color schemes and typography.
- Created visually appealing and harmonious color palettes that enhance the overall aesthetic of the app.
- Utilized typography effectively to convey the brand personality and enhance readability.
- Developed a responsive design that ensures a seamless and consistent user experience across various mobile devices.
- Paid attention to user interface (UI) design principles to create an intuitive and user-friendly app.
- Incorporated modern design elements and trends to keep the app visually engaging and up to date.
- Implemented user-centered design approaches to understand and meet the needs of the target audience.
- Conducted thorough user testing and gathered feedback to refine the design and improve usability.
- Ensured that the app's layout and interactions are optimized for mobile screens of different sizes and resolutions.
- Followed industry best practices for mobile app design to enhance usability and accessibility.

### ASAP

*ASAP | March 2023*

- Designed the mobile application "ASAP" with a cybersecurity-inspired design.
- Created a visually striking and modern user interface that conveys a sense of security and trust.
- Developed the application with the purpose of stopping SMS bombs, scams, and fraudulent phone calls.
- Incorporated robust security measures and algorithms to detect and prevent malicious activities.
- Implemented features that allow users to report and block suspicious phone numbers or messages.
- Designed an intuitive and user-friendly interface for easy navigation and interaction.
- Prioritized user privacy and data protection throughout the application's design and functionality.
